EARTH DAY FORUM

Healing Grounds: The Deep Roots of Regenerative Farming

Saturday, April 8,
2:00 – 4:00 pm (PDT)
Concord Hall
1407 Chapala Street
Santa Barbara, CA
Presenter: Liz Carlisle,
Environmental Studies,
UC Santa Barbara
Modes of participation:
In-person and live webcast

In celebration of Earth Day, Professor Liz Carlisle will talk about the deep roots of regenerative farming. Through stories of Black, Latino, Latina, Native American and Asian small farmers in the United States, we will learn how traditional methods of growing food used by their ancestors, that focus on cooperation and reciprocity in nature, are being rediscovered and applied today in a variety of contexts to create healthy, balanced ecosystems. She will also point out some of the costly ramifications to the globe of ignoring the wisdom inherent in these traditions. Her latest book is titled: *Healing Grounds*.

Live Webcast begins @ 2:00 p.m. To participate, go to:
<https://www.youtube.com/c/IWCinSantaBarbara/live>
The presentation will also be recorded and available at the same link for future viewing.
