

Green New Deal Legislation H.R. According to [The Washington Post](#) (February 11, 2019), the resolution calls for a “10-year national mobilization” whose primary goals would be:^[50]

- "Guaranteeing a job with a family-sustaining wage, adequate family and medical leave, paid vacations, and retirement security to all people of the United States."
- "Providing all people of the United States with – (i) high-quality health care; (ii) affordable, safe, and adequate housing; (iii) economic security; and (iv) access to clean water, clean air, healthy and affordable food, and nature."
- "Providing resources, training, and high-quality education, including higher education, to all people of the United States."
- "Meeting 100 percent of the power demand in the United States through clean, renewable, and zero-emission energy sources."
- "Repairing and upgrading the infrastructure in the United States, including . . . by eliminating pollution and greenhouse gas emissions as much as technologically feasible."
- "Building or upgrading to energy-efficient, distributed, and ‘smart’ power grids, and working to ensure affordable access to electricity."
- "Upgrading all existing buildings in the United States and building new buildings to achieve maximal energy efficiency, water efficiency, safety, affordability, comfort, and durability, including through electrification."
- "Overhauling transportation systems in the United States to eliminate pollution and greenhouse gas emissions from the transportation sector as much as is technologically feasible, including through investment in – (i) zero-emission vehicle infrastructure and manufacturing; (ii) clean, affordable, and accessible public transportation; and (iii) high-speed rail."
- "Spurring massive growth in clean manufacturing in the United States and removing pollution and greenhouse gas emissions from manufacturing and industry as much as is technologically feasible."
- "Working collaboratively with farmers and ranchers in the United States to eliminate pollution and greenhouse gas emissions from the agricultural sector as much as is technologically feasible."
